SupaMetallic

Ordering Guide.

Ordering Requirements.

1. Add "Metallic" in the Job Description field.
2. Specify metallic process type and spot colours needed in both the Job Comment and Colour fields.
3. Fill in additional details as normal.

When you order SupaMetallic, we've made it Supaeasy with no additional pricing schemes. Simply select your preferred transfer type as normal (e.g. **WE_A4, BL_LC, etc.**)

For any questions you may have regarding SupaMetallic, please be sure to reach out to us, we're here to help you make it! - hello@supacolour.co.uk

SupaMetallic

Ordering Guide.

Colour Options.

SupaMetallic transfers are available in the colours provided below. You should have received a physical sheet to compare this to, and make the best selection for your design.

Each swatch has an associated "M-code", with numbers 1-28. This will make it Supaeasy to select the right colours for your design.

SupaMetallic

Ordering Guide.

Spot Metallic.

This option is used when you only want specific colours in your artwork to be made metallic. To achieve this, vector artwork is necessary.

When ordering this option, create your artwork with CMYK values matching the provided Colour Option swatches.

List out what parts of your artwork is required to be metallic in the **Job Comment** and the **Colour** fields, using the M-codes and / or CMYK breakdowns.

Single Colour Metallic.

Using a single-colour design, specify the colour you want your artwork to be printed with in the Colour field - either Silver or Gold.

Transfer Type WE_A4:Wearable-A4 300x210	Description Gold Chain Metallic	Garment Colour / Type Black Cotton
Colours Metallic Gold	Size 210mm Wide	
Quantity 50		Artwork Upload Art

Flood Metallic.

With this option, we apply the silver ink to the entire artwork file. The metallic effect will be more visible in lighter colours and less visible in the darker.

Please Note: any white in your artwork will turn silver.

When ordering this option, please specify in both the **Job Comment** and **Colour** fields that the order is to use Flood Metallic.
